The application has been amended as follows:

In claim 20, line 10, replacing "fop" with --for--.

4. Claims 8-15, 20-21 are allowed.

The following is an examiner's statement of reasons for allowance:

Regarding claim 8, Wells et al. (U.S Patent No. 5,574,879) disclose, in FIG. 2, a semiconductor device comprising converting means (23) for converting a logical address into a physical address; a plurality of multilevel memory cells (231) arranged so as to correspond to a physical address space including the physical address, each cell storing  $2^n$  levels of data each expressed by  $n$  ( $n \geq 2$ ) number of bits ( $X_1, X_2, \dots, X_n$ ); specifying means for specifying the most significant bit  $X_1$  by one-time specifying operation, by means of a reference value when the semiconductor device is in a standard cell mode; and outputting means (235, see FIG. 6) for outputting the specified bit from one of the cells when the memory device is in the standard cell mode.

However, Wells et al. do not disclose judging means for judging whether a logical address space including the logical address matches the physical address space.
